## ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

CURRENT TRENDS  
Week Ending 6 April 1946

The annual admission rate per 1,000 for All Causes dropped sharply again this week, to a value of 689 as against 725 the week before; that rate is very close to the one of 691 reported a year ago for the corresponding period. The drop is noted in all Districts except the 3rd, 7th and 13th Districts; of these, the 3rd District shows the largest gain, about 2.2% of last week's rate, which is very insignificant. On the other hand, the improvements are much more decisive, ranging from approximately 19%, in case of the 1st District, on down. The 5th District has the highest rate with 1005, while the 4th District is lowest with 440.

Respiratory Diseases likewise show a definite drop, when their combined rate for the week falls to 179.1 from 193.7 for the previous week. That rate also compares favorably with the one of 207 reported a year ago. The diseases are on the decrease in all but the 1st and 11th Districts; the latter shows no significant gain, while the former has only a 12% rise. Here again, the improvements are much more decisive, with decreases approaching 20% or better in many of the districts. Although its rate dropped 3.5% from last week, the 5th District still leads with 349.7, while the Potomac and Severn River Commands have the lowest rate, 56.2.

INFLUENZA AND CATARRHAL FEVER, ACUTE. These two infections decreased sharply, as their combined rate reaches a new low of 98.3 which is 13% below last week's rate of 112.8, and better than 23% below the rate of 128.3 reported a year ago. The decrease, ranging upward to 36%, in case of the 3rd District, is present in all but the 13th District which registers instead a 13% gain. The highest rate, 231.9 comes from the 5th District, while the lowest rate, 31.8, is from the Potomac and Severn River Commands.

PNEUMONIA--BRONCHO AND LOBAR. A sharp decline in these two diseases brings their rate to 0.7, a near insignificant value which is half the value shown a week ago, and nearly one sixth the rate reported a year ago. The decrease is universal with the exception of the 5th District whose rate of 2.8 is the largest reported. Other Districts have rates ranging from 1.1 to 0.

PNEUMONIA, ATYPICAL. The rate for this disease dropped approximately 10% again this week, to a value of 3.0; nevertheless, the latter is still above the rate of 2.0 reported a year ago. The 11th District still leads with a rate of 10.9, while the other Districts have rates ranging from 5.4 to 0.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two infections are the only ones whose rate does not show a decline; however, the rate of 77.1 reported for this week, does not indicate any significant change from the previous week; it is, nevertheless, about 7% higher than the figure shown a year ago. Unlike the other diseases discussed here, the gains for the various Districts far exceed the improvements. Thus, the 1st District experiences a better than 50% rise as its rate reaches 62.6, while the rate of 51.1 for the 6th District marks an increase of over 47%. The 8th District with a rate of 32.7 comes in also for a nearly 29% rise. The decreases, on the other hand, are minor, except in the case of the 13th District whose rate of 50.9 denotes a 28.5% drop from the past week. The 9th District still stands highest with a rate of 150.3, while the two River Commands are lowest with 24.4.

SCARLET FEVER. This disease continues to decline as its rate dropped to 15.2 from 16.1 for the past week, and 17.2 for the week before. It also compares favorably with the value of 21.0 reported a year ago. Great improvement is shown by the 5th District whose rate dropped during the week from 40.5 to 26.3. Meanwhile, the infection made a sharp gain in the 9th District as its rate jumped from 26.4 to 38.3, the highest reported. The 1st, 4th, 6th and 7th Districts, as well as the two River Commands reported no incidences.

MEASLES. This disease continues to decline also, but its rate of 11.8 is still well above the one of 7.0 reported a year ago. The 11th District still runs very high, with a rate of 42.1 which marks a further increase over last week's rate of 35.8. Other Districts have rates ranging from 13.4, in case of the 6th District, to 0 in case of the 4th District and the two River Commands.
